December 3, 2010

NOTICE OF CONSTRUCTION

ROOSEVELT ROAD STREET BEAUTIFICATION PROJECT

Dear Roosevelt Road Business Owners and Residents:

This letter is to inform you that new sidewalk has been constructed in front of your building, with the exception of a few small areas to follow next week, along with the placement of the brick pavers at the new bump outs. Pedestrian traffic and parking has been restored, however we urge the importance of obeying the barricades still in place where there is still some work to be done.

Minor Construction activity for this season will last until approximately December 17, 2010, however the street and sidewalk will remain open to normal traffic and parking during the remaining construction.

The long wires you see extending from the new light pole foundations will be cut back and then capped with a bolt on cone until approximately mid to late February, at which time the new light poles will be erected.

During the winter it is common practice to use chemical de-icing agents to melt the ice that forms as a result of accumulated snow and water. These products can severely damage the surface of newly fashioned concrete sidewalks, driveways, and curb. We kindly urge you to keep the sidewalk and driveways in front of your building free from the accumulation of snow, water, and ice, and avoid using de-icing products containing Calcium Chloride & Sodium Chloride. We urge you to remove snow and ice by shovel or similar method. De-icing agents comprised of Magnesium Chloride can lessen the severity of damage caused by de-icing agents and should only be used if needed. These products are available at your local hardware or lawn/garden store such as Tele-Tron Ace Hardware located at 6604 Cermak Rd in Berwyn, PJ's Ace Hardware at 7 Chicago Ave in Oak Park, and Home Depot at 2803 S Cicero Ave in Cicero. Please remember that de-icing chemicals can severely damage the surface of concrete less than 12 months old.

Construction updates are available to view on the internet at www.rooseveltroad.com.

Please direct all questions, concerns, or complaints directly to John Cashman, Site Project Manager at 312-656-4774. The construction office is located at 7003 W. Roosevelt Road in Berwyn. Field office phone number is 708-788-6106.

Sincerely,
TERRA ENGINEERING, LTD., THE VILLAGE OF OAK PARK, THE CITY OF BERWYN, AND
THE TOWN OF CICERO.
